**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Claims 1-8 are in the application.

#### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 5,6, the recitation "the sail mounted on said reel is non-deformable in compression around the reel and parallel to its hoist side". It is not particularly clear what is meant by "parallel to its hoist side". The sail, in effect, comprises a surface area. How is this area "parallel" to the hoist side?

In the last line of claim 1, the recitation "the whole then being bonded" lacks proper antecedent. What is "the whole"?

In claim 3, the last clause "possibly reinforced for torsion" makes this claim indefinite for it is not clear whether that last limitation is in effect part of the claimed subject matter.

In claim 6, line 2, the recitation "may be of cylindrical" makes this claim indefinite for the metes and bounds of the claim can not be determined.

4. Because of the indefiniteness of the claims, it is not possible to apply the prior art. However, to expedite the prosecution of this case, the claims will be examined as best understood.

*Claim Rejections - 35 USC § 103*

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown (5,315,948) in view of Baudet (6,302,044).

Brown discloses a sail 5 designed to be rolled on a reel 6. The reel 6 is designed to be thicker in cross section along the middle and thinner in the ends creating a bi-conical reel, generally as in claim 2. Baudet discloses a sail construction wherein the sail is produced from transverse and longitudinal fibers 24, 26 incorporated between two films 32, 42.

In view of these disclosures, it would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute for the sail of Brown with a sail constructed generally as taught by Baudet. The specific materials used in the fibers and the films are deemed to have been obvious matters of design choice to one having ordinary skill in the art. The motivation for substituting the sail would be to provide a more durable sail.

*Conclusion*

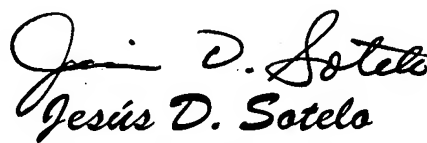

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hill (4,449,497) is cited as showing a sail construction.
